

Converting Strings to Integers (atoi())

You will need to convert a command line argument to a number for your tutorials

The easiest way to do this is with the `atoi()` function from `stdlib.h` - see `man 3 atoi`

```
#include <stdio.h>
#include <stdlib.h>
int main( int argc, char** argv ) {
    int count = 0;
    if( argc > 1 ) count = atoi(argv[1]);
    for( int i=1; i<=count; i++ ) {
        printf( "%d\n", i );
    }
    return 0;
}
```
