SQL Style

- keywords in CAPS
- statements inside other statements indented
- Each value in a list must be on a new line, except FROM statements
- Use spaces to align statements
- JOIN statements should be on one line (not including ON statements)
- Nothing special for INTERSECT, UNION etc
- Add conditions to JOIN clause, rather than creating a WHERE clause
- Use WITH to avoid repeating definitions
- You are able to change correlated subqueries into normal subqueries in certain circumstances
- Align JOIN and ON
